

Compliance Assessments

Data compliance mandates and concerns about personal data privacy continue to grow, it's a challenge to keep up. In the United States, 20 states passed new data privacy laws since 2018. GDPR (General Data Protection Regulation) came into effect in 2018 and is generally considered the most significant data privacy regulation enacted in the last couple of decades.

Bluesource compliance assessments help ensure businesses are ready for any regulatory deadlines.

Our assessments cover a variety of IT applications and systems: on-premises solutions, cloud solutions, and shadow IT.

Compliance Assessments involve assessing the present level of security and providing a comprehensive report on steps needed to become and remain compliant.

\$5.7 Billion
Cumulative total
GDPR fines

Industry-Specific Regulations

- HIPAA (Health Insurance Portability and Accountability Act)
- SOX (Sarbanes-Oxley) Act
