

Migrating Your Data From Anywhere... to Anywhere!

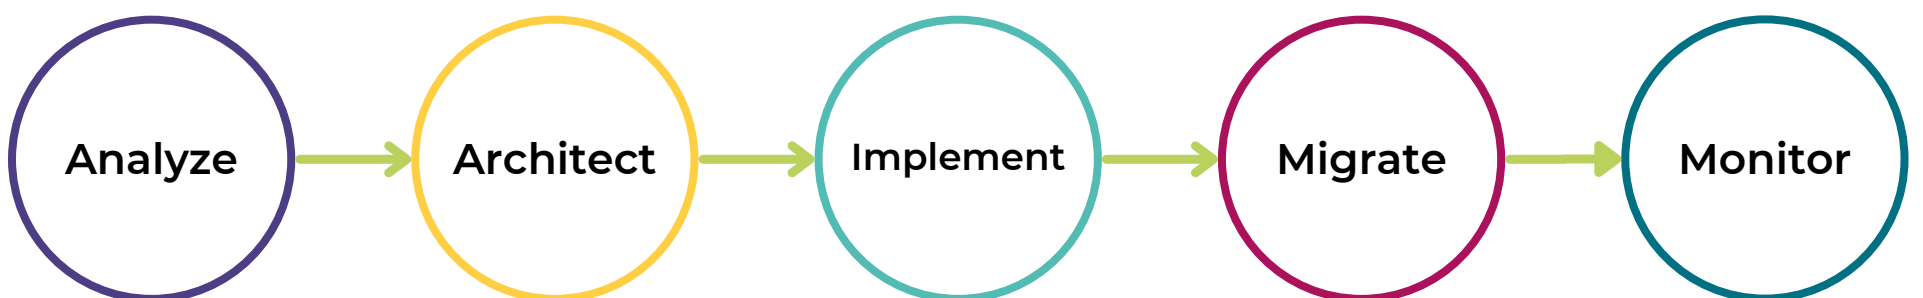

Data migration is a key part of data compliance, system or software upgrades, and preparing for disaster recovery. Email platforms and archive systems have changed a lot over the last couple of decades. Bluesource's migration team works hard to keep up with new technology, and our list of compatible data sources keeps growing.

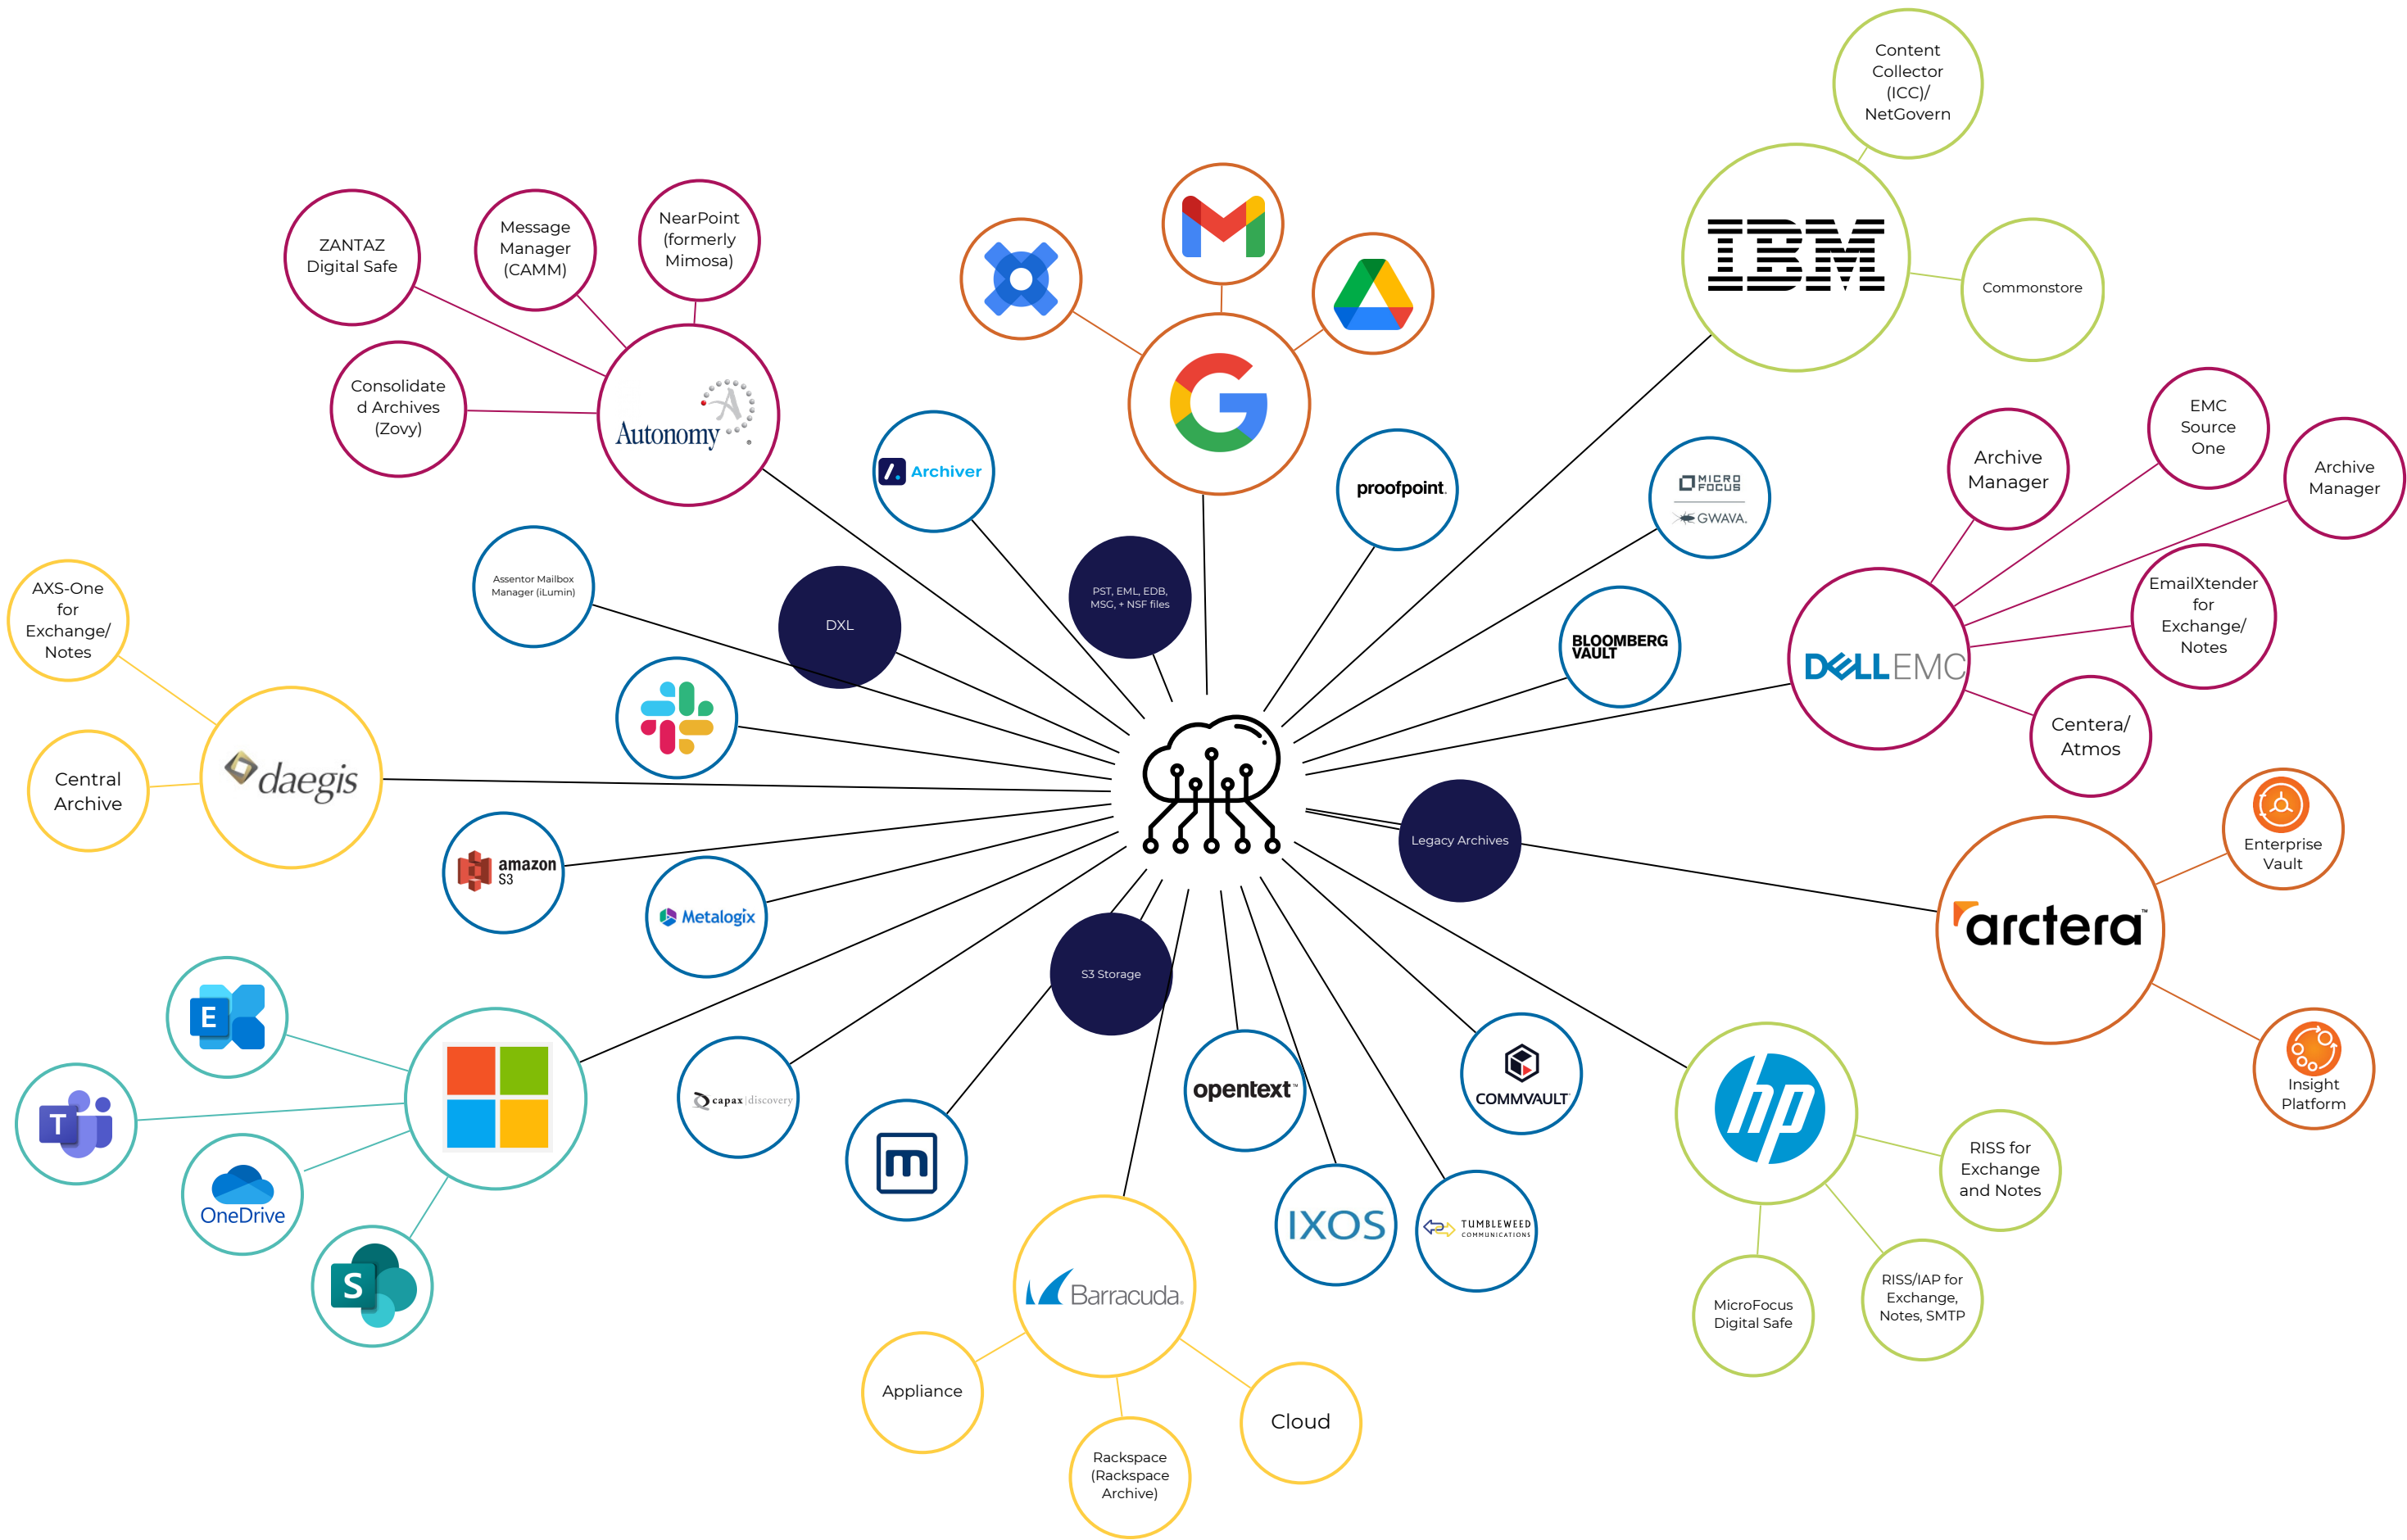

Getting a migration right is critical. Bluesource's team of professionals works to ensure retention for compliance purposes, limit downtime, and stay within budget.

Why Choose Bluesource?

- Bluesource's dedicated team handles your migration needs, freeing up your IT department to focus on business-critical projects.
- Bluesource has over a decade of experience in archive migrations and we've moved PBs of data.
- Our fixed fee per GB pricing means no surprises.
- We can move TBs of data per day.
- Our migrations team is available for around-the-clock support.
- A full Chain-of-Custody (CoC) report provides proof that your data has not been altered during the migration process.

Founded in 2001, Bluesource has been helping organizations around the globe address their compliance, archiving, and eDiscovery needs. Responsible for shifting over Five Petabytes of data, we are experts in Microsoft365, a Veritas Platinum partner, and one of just 18 High Touch Microsoft Gold partners holding seven gold competencies.

Supported Migration Platforms

Bluesource can work with a variety of data sources: major players and household names like Google and Microsoft, programs like Mimecast, legacy archives with PST, NSF, and other file types, and more.
