

# EV247™

## Cloud Archiving Without Compromise

Allowing organizations to move their on-premises Enterprise Vault™ to Azure™, fully managed by our award-winning Managed Services. As a Bluesource EV247™ client, IT teams receive a dramatically improved archiving service that is protected by a financially backed SLA. In our SaaS model, the application and infrastructure is fully managed by trained professionals, freeing personnel to focus on critical projects.

### Save 300+ Hours

EV247™ clients save hundreds of hours a year, freeing up time for business growth and strategy.

### Guaranteed Availability

EV247™ guarantees availability of your data:

- 99.9% uptime SLA
- Performance guarantee
- Response time guarantee

### Improved Cost-Efficiency

With cloud economics, businesses benefit from a lower total cost of ownership, without sacrificing functionality.

- Upgrades and patches for no additional charge
- Peace of mind with predictable spending

### Cloud-First Directives

Moving from on-premises EV to a cloud-based system with Azure includes all the perks of being cloud first. Plus no longer dealing with:

- Aging infrastructure
- High management costs
- Power and cooling costs
